19/03/2026	TC_057	Desktop				In the Time Log section, records for the current month and previous month are not visible. The user is unable to track how much work has been done during these periods.	The Time Log section should display complete records of work done for both the current month and previous month. Users should be able to easily view and track their work history for these time periods.	Open	High		https://prnt.sc/a71LH5dZ7N7					
19/03/2026	TC_058	Desktop				The dashboard currently shows only Casual Leave, Paid Leave, and Half Days. Other types of leave (e.g., Sick Leave, WFH/Remote Work, Maternity/Paternity, Compensatory Off) are not displayed.	1.)A complete and clear Employee Dashboard should display. a.)Casual Leave (CL) – Balance and used days. b.)Paid / Earned Leave (PLEL) – Balance and used days. c.)Sick Leave (SL) – Balance and used days. d.)Half Days – Count of half-day leaves taken. e.)WFH / Remote Work – Days worked from home, not deducted from leave. f.)Optional: Maternity/Paternity Leave, Compensatory Off, Unpaid Leave (if applicable).	Open	High		https://prnt.sc/E6w2wYagQM9m					
19/03/2026	TC_059	Desktop				The Back button is missing on the page, so the user cannot navigate to the previous page.	A Back button should be available on the page so that the user can easily return to the previous page and clearly understand which module they are in.	Open	High		https://prnt.sc/hGQDPQV4E_GSP					
19/03/2026	TC_060	Desktop				1.)The timezone "Asia/Kolkata" is displayed on the UI, but it is not clickable. 2.)The description field shows HTML format instead of properly rendered text. 3.)Dates are shown in mixed formats, inconsistent across the application.	1.)If the timezone is displayed, it should either be informative only or clickable for timezone settings. If not clickable, consider removing it to avoid confusion. 2.)The description field should display clean, readable text instead of raw HTML. 3.)All dates should follow a consistent format, e.g., dd/mm/yy, throughout the UI.	Open	High		https://prnt.sc/y7w2b-ORq4fE					
19/03/2026	TC_061	Desktop				1.)Search field issues: a.)No search icon is displayed. b.)Cut (clear) icon does not appear when text is entered. 2.)Pagination issues: a.)Pagination does not match the format used on the previous page or other modules.	1.)Search field: a.)A search icon should be visible in the input box. b.)When text is entered, a cut (clear) icon should appear, allowing users to quickly clear the text. 2.)Pagination: a.)Pagination should follow the same format and style as used on the previous page/module for consistency.	Open	High		https://prnt.sc/a61NqyvW6Tt3					
19/03/2026	TC_062	Desktop				1.)The back button is not present on the page. 2.)Users cannot easily navigate to the previous page or module.	1.)A back button should be displayed at the top-left (or consistent position according to UI design). 2.)Clicking the back button should take the user to the previous page or module they navigated from.	Open	High		https://prnt.sc/Yq1ByFJdaefJ					
19/03/2026	TC_063	Desktop				1.)The calendar format is inconsistent or unclear. 2.)Users are unable to link their Google Calendar with the application.	1.)The calendar should display day, date, and month clearly and consistently. 2.)Users should be able to link their Google Calendar with the application.	Open	High		https://prnt.sc/19M4nagDSQ					
19/03/2026	TC_064	Desktop				1.)The back button is not present on the page. 2.)Users cannot easily navigate to the previous page or module.	1.)A back button should be displayed at the top-left (or consistent position according to UI design). 2.)Clicking the back button should take the user to the previous page or module they navigated from.	Open	High		https://prnt.sc/mvEvaW9yVZQg					
19/03/2026	TC_065	Desktop				1.)The same icon is used repeatedly in multiple places across the module. 2.)Users may get confused about the icon's function since it appears for different actions.	1.)Each action or function should have a distinct and meaningful icon. 2.)Icons should be consistent with their purpose and not reused.	Open	High		https://prnt.sc/7L4Z2XmdQWAO					
20/03/2026	TC_066	Desktop				1.)In the Leave Type dropdown, only Sick Leave and Casual Leave are displayed. Other leave types like Paid/Earned Leave, Half Days, WFH/Remote Work are missing. 2.)The dropdown arrow is always pointing down, regardless of whether the list is expanded or collapsed. 3.)a.)When clicking on the Start Date field, the calendar/date picker opens. b.)However, the calendar icon is not visible next to the field. c.)Users have no visual cue that the field is interactive.	1.)The Leave Type dropdown should display all relevant leave types: a.)Casual Leave (CL) b.)Sick Leave (SL) c.)Paid / Earned Leave (PLEL) d.)Half Days e.)WFH / Remote Work f.)Optional: Maternity/Paternity Leave, Compensatory Off, Unpaid Leave 2.)The dropdown arrow should change direction based on the state: a.)Down arrow when collapsed b.)Up arrow when expanded 3.)a.)A calendar icon should be displayed next to the Start Date field. b.)Clicking either the field or the icon should open the calendar/date picker. c.)The presence of the icon makes it intuitive for users to know they can select a date.	Open	High		https://prnt.sc/246d4PekS4s					
20/03/2026	TC_067	Desktop				1.)When submitting the form with missing or incorrect fields, alerts are not properly shown. a.)The user cannot easily tell which field has an issue. 2.)After clicking the Submit button once, it becomes unresponsive. a.)Users cannot click it again if they want to correct any errors.	1.)The form should display clear and specific alerts for each required or invalid field. a.)Example: "Employee Name is required" or "Start Date cannot be empty". 2.)The Submit button should remain functional: a.)Users should be able to resubmit the form after correcting errors. b.)Disable only during actual submission to prevent double submission, then re-enable if errors occur.	Open	High		https://prnt.sc/1af3DOvcmqQw					
20/03/2026	TC_068	Desktop				1.)If the user does not fill even a single required field, the form does not show proper alerts indicating which fields are missing. 2.)After clicking the Submit button once, it becomes unresponsive, even if the user corrects the fields. 3.)Users cannot submit the form again after fixing the errors. 4.)When clicking the cut (clear) icon, it does not change to red according to the website theme.	1.)The form should display clear, specific alerts for every required field that is empty or invalid. Example: a.)"Employee Name is required" b.)"Start Date cannot be empty" 2.)The Submit button should remain functional after correcting errors: a.)Users should be able to resubmit the form after fixing the missing or invalid fields. b.)Only temporarily disable the button during the actual submission process to prevent double submission. 3.)Clicking the cut icon should display the red color as per the website theme.	Open	High		https://prnt.sc/CIL45wWdDeQJQ					
20/03/2026	TC_069	Desktop				1.)When clicking on a Sunday, the system shows the alert: a.)"You haven't Check-in that Day" 2.)This is incorrect, because Sundays are typically non-working / official holidays, so no check-in is expected.	1.)For Sundays or official holidays: a.)No check-in alert should appear. b.)Optionally, display a message indicating it's a holiday (e.g., "This day is an official holiday"). 2.)Alerts should only appear for valid working days where check-in is expected.
